Package dimensions: L 86.5 x W 86.5 x H 5.7 cm

Package weight: 14.49 kg

REVOLUTION™ DUAL FUEL

The Coleman Revolution™ Dual Fuel BBQ With Flare-Free Technology™ provides versatile integration with the modules, offering the flexibility to install modules on both the left and right sides enhancing the customisation possibilities.

Note: After removing foldable shelves they are no longer compatible to reattach to any of the module extensions.

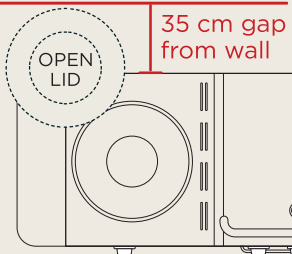

✓ Ideal positioning for module.

✗ The Module is incompatible with this positioning.

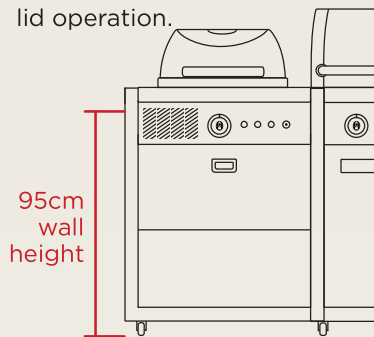

Modules with a grease cup will include a front panel piece to cover unneeded grease cup hole.

Maintain a minimum 35 cm clearance from wall. To avoid the lid collision. (Includes 20 cm gap behind modules)

Or use against wall height under 95 cm for smooth lid operation.

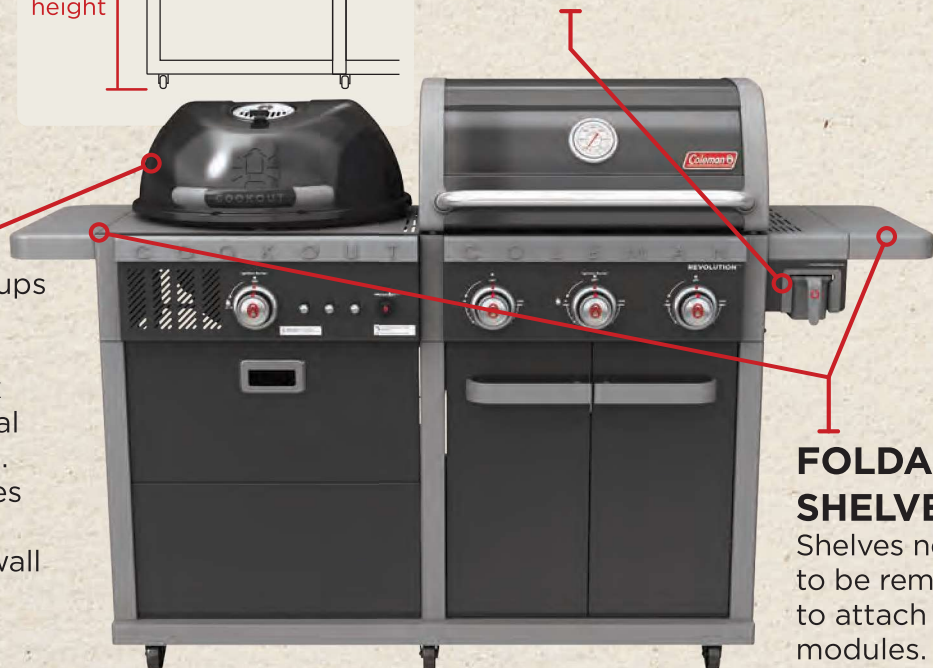

GREASE CUP

The first module on right must include a grease cup. It will need to be a **Sink or Cupboard with Drip Cup** Module.

CHARCOAL GRILL HOOD

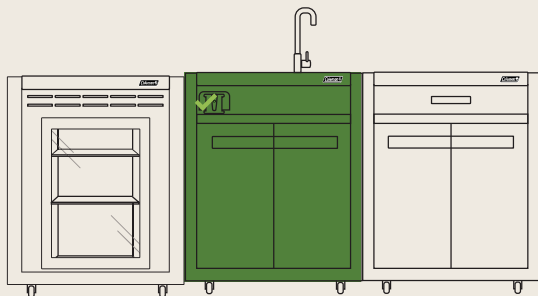

For outdoor kitchen setups with the Dual Fuel BBQ, maintain at least 20 cm clearance from the back wall to allow the charcoal lid to open fully (35 cm). Outdoor kitchen modules provide a 15 cm gap. Alternatively, keep the wall height under 95 cm for smooth hood operation.

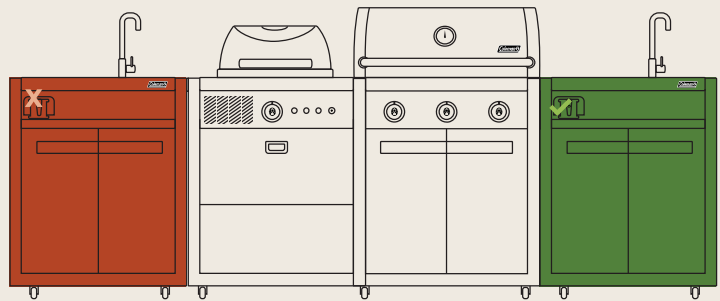

FOLDABLE SHELVES

Shelves need to be removed to attach the modules.

REVOLUTION™

4-Burner

The Coleman Revolution™ 4-Burner BBQ with Flare-Free Technology™ has simple integration with the modules, allowing you to create your customised outdoor kitchen. The built-in shelf on the right-hand side can also be removed and repositioned on the outermost module, allowing you to extend your kitchen workspace and make the most of your customised layout.

Note: Due to the gas burner configuration on the left side, modules can only be attached on the right side of the 4-Burner.

Ideal positioning for module.

The Module is incompatible with this positioning.

Modules with a grease cup will include a front panel piece to cover unneeded grease cup hole.

The 4-Burner's right-hand shelf can be removed and reattached to all Revolution™ Modules.

LEFT SHELF SIDE STOVE

Gas line inhibits modules from being attached to the left-hand side.

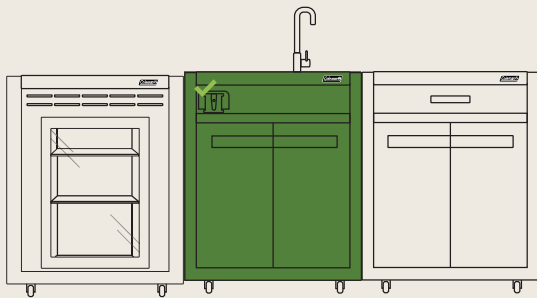

GREASE CUP

The first module on right must include a grease cup. It will need to be a **Sink** or **Cupboard with Drip Cup** Module.

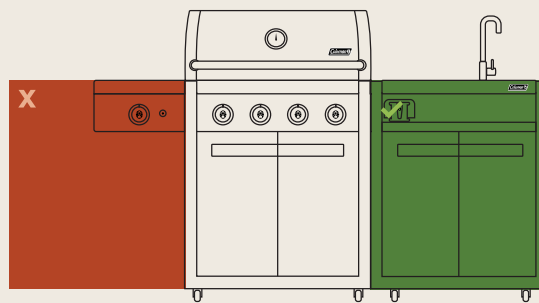

RIGHT SHELF

This shelf can be relocated to the end of any module. A front panel piece is included to cover Grease Cup hole. All modules that feature a integrated grease cups contain x1 front panel piece.
